SUBJECT INDEX
VOLUME 46

A

Abrasion Testing.

The Falling Sand Abrasion Tester—C. C. Hipkins and R. J. Phair. Published in ASTM BULLETIN, No. 143, December, 1946, p. 18.

A New Sandpaper Abrasion Tester—F. M. Gavan, S. W. Eby, Jr., and C. C. Schrader. Published in ASTM BULLETIN, No. 143, December, 1946, p. 23.

Absorption.

Development of a Method of Test for Soil. Bituminous Mixtures—E. O. Rhodes and P. F. Phelan, 1416. Discussion, 1429.

Accelerated Testing.

See **Corrosion; Weathering.**

Acid Stability.

The Evaluation of Surface-Active Agents—Jay C. Harris. Published in ASTM BULLETIN, No. 140, May, 1946, p. 76. Continued in ASTM BULLETIN, No. 141, August, 1946, p. 49.

Adhesives.

Adhesives. Report of Committee D-14, 439.

Impact Testing of Adhesives—Arthur H. Falk. Published in ASTM BULLETIN, No. 141, August, 1946, p. 42.

The Theoretical Basis of Adhesion—W. A. Weyl, 1506. Discussion, 1517.

Admixtures.

Concrete Flooring with Asphalt Admixture—F. O. Anderegg. Published in ASTM BULLETIN, No. 143, December, 1946, p. 11. Discussion, p. 15.

Laboratory Investigation of Anti-Stripping Admixtures Used for Promoting Wetting Power and Adhesion Between Bitumens and Aggregates—John C. Sprague, 1377. Discussion, 1407.

A Study of Durability and Void Characteristics of Concretes Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

Aggregates.

Concrete and Concrete Aggregates. Report of Committee C-9, 312.

Effects of Alkalies in Portland Cement on Durability of Concrete, R. F. Blanks. Report of Working Committee of Committee C-1. Published in ASTM BULLETIN, No. 142, October, 1946, p. 28.

Laboratory Investigation of Anti-Stripping Admixtures Used for Promoting Wetting Power and Adhesion Between Bitumens and Aggregates—John C. Sprague, 1377. Discussion, 1407.

Modulus of Elasticity of Aggregates and Its Effect on Concrete—H. A. LaRue, 1298. Discussion, 1310.

Aging.

Report of Subcommittee V on Exposure and Corrosion Tests of Die Castings. Committee B-6, 244.

Air-Entraining Admixtures.

A Study of Durability and Void Characteristics of Concrete Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

Alloy Steel.

See also **Steel.**

The Effect of Carbide Spheroidization upon the Rupture Strength and Elongation of

A

Abrasion Testing.

The Falling Sand Abrasion Tester—C. C. Hipkins and R. J. Phair. Published in ASTM BULLETIN, No. 143, December, 1946, p. 18.

A New Sandpaper Abrasion Tester—F. M. Gavan, S. W. Eby, Jr., and C. C. Schrader. Published in ASTM BULLETIN, No. 143, December, 1946, p. 23.

Absorption.

Development of a Method of Test for Soil. Bituminous Mixtures—E. O. Rhodes and P. F. Phelan, 1416. Discussion, 1429.

Accelerated Testing.

See **Corrosion; Weathering.**

Acid Stability.

The Evaluation of Surface-Active Agents—Jay C. Harris. Published in ASTM BULLETIN, No. 140, May, 1946, p. 76. Continued in ASTM BULLETIN, No. 141, August, 1946, p. 49.

Adhesives.

Adhesives. Report of Committee D-14, 439.

Impact Testing of Adhesives—Arthur H. Falk. Published in ASTM BULLETIN, No. 141, August, 1946, p. 42.

The Theoretical Basis of Adhesion—W. A. Weyl, 1506. Discussion, 1517.

Admixtures.

Concrete Flooring with Asphalt Admixture—F. O. Anderegg. Published in ASTM BULLETIN, No. 143, December, 1946, p. 11. Discussion, p. 15.

Laboratory Investigation of Anti-Stripping Admixtures Used for Promoting Wetting Power and Adhesion Between Bitumens and Aggregates—John C. Sprague, 1377. Discussion, 1407.

A Study of Durability and Void Characteristics of Concretes Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

Aggregates.

Concrete and Concrete Aggregates. Report of Committee C-9, 312.

Effects of Alkalies in Portland Cement on Durability of Concrete, R. F. Blanks. Report of Working Committee of Committee C-1. Published in ASTM BULLETIN, No. 142, October, 1946, p. 28.

Laboratory Investigation of Anti-Stripping Admixtures Used for Promoting Wetting Power and Adhesion Between Bitumens and Aggregates—John C. Sprague, 1377. Discussion, 1407.

Modulus of Elasticity of Aggregates and Its Effect on Concrete—H. A. LaRue, 1298. Discussion, 1310.

Aging.

Report of Subcommittee V on Exposure and Corrosion Tests of Die Castings. Committee B-6, 244.

Air-Entraining Admixtures.

A Study of Durability and Void Characteristics of Concrete Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

Alloy Steel.

See also **Steel.**

The Effect of Carbide Spheroidization upon the Rupture Strength and Elongation of

Alloy Steel—*continued.*
Carbon-Molybdenum Steel—S. H. Weaver, 856. Discussion, 867.
Effect of Temperature on the Properties of Metals. Report of Joint Research Committee, 180.
Filler Metal. Report of Joint Committee. Published in ASTM BULLETIN, No. 141, August, 1946, p. 56.
Investigation of Materials for Marine Propellers—William C. Stewart and W. Lee Williams, 836.
Iron-Chromium, Iron-Chromium-Nickel, and Related Alloys. Report of Committee A-10, 171.
Magnetic Properties. Report of Committee A-6, 168.
A Permeameter for Metals Used in Cathode-Ray and Television Tubes—Howard J. Evans, 1119.
Report on the Inspection of the Corrosion-Resisting Steel Deck Houses on the U. S. Navy Destroyers Farragut and Alwyn. Appendix II, Report of Committee A-10, 179.
Report on Passivation of Corrosion-Resistant Steels, F. L. LaQue, Appendix I, Report of Committee A-10, 175.
Resistance of Iron-Nickel-Chromium Alloys to Corrosion in Air at 1600 to 2200 F.—Anton deS. Brasunas, James T. Gow, and Oscar E. Harder, 870. Discussion, 894.
Studies on Susceptibility of Casting Steels to Graphitization (Project No. 29), J. J. Kanter and E. A. Sticha. Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, Appendix, 182.
A Study of the Geometry of the Tension-Impact Specimen—N. A. Kahn and E. A. Imbembo, 1179. Discussion, 1191.
Symposium on Atmospheric Weathering of Corrosion-Resistant Steels:
Atmospheric Corrosion Tests on High-Chromium Steels—W. O. Binder and C. M. Brown, 593. Discussion, 609.
Corrosion-Resistant Steel for Architectural and Structural Applications—H. A. Grove, 610. Discussion, 614.
Atmospheric Corrosion Tests of Corrosion-Resistant Steel Wires—A. P. Jahn, 618.
Corrosion-Resistant Steel Sheet in Marine Atmospheres—Willard Mutchler, 621. Discussion, 640.
Atmospheric Corrosion Tests on Corrosion-Resistant Steel—Grant L. Snair, Jr., 642.
Weathering Behavior of Corrosion-Resistant Steel Insect Screens—W. A. Wesley and H. R. Copson, 652. Discussion, 666.
Results of 15 Years' Exposure on Corrosion-Resistant Steels—I. V. Williams and K. G. Compton, 673.

Alloys, Non-Ferrous.
See also **Aluminum; Brass; Bronze; Copper; Magnesium; Zinc.**
Aluminum-Base Die-Casting Alloys Nos. IVa, Va, and V. Report of Subcommittee I, Committee B-6, 225.
Atmospheric and Indoor Aging Studies on Some Aluminum and Zinc-Base Die-Casting Alloys—G. R. Gohn and Lucille E. Menges, 1064. Discussion, 1095.
Calculation of Electrical Contacts Under Ideal Conditions—Erle I. Shobert II, 1126. Discussion, 1145.
Chemical Analysis of Metals. Report of Committee E-3, 478.
Compressive Properties of Aluminum Alloy Sheet at Elevated Temperatures—Alan E. Flanagan, Leslie F. Tedsen, and John E. Dorn, 951. Discussion, 968.
Compressive Stress-Strain Properties of Some Aircraft Materials—P. E. Sandorff and R. K. Dillon, 1039.
Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, 202.
Corrosion of Non-Ferrous Metals and Alloys. Report of Committee B-3, 194.
Creep Tests on Some Extruded Lead and Lead-Alloy Sleeves and Tapes—G. R. Gohn, S. M. Arnold and G. M. Bouton, 990. Discussion, 1021.
Die-Cast Metals and Alloys. Report of Committee B-6, 222.
Effect of Temperature on the Properties of Metals. Report of Joint Research Committee, 180.
Electrical-Heating, Electrical-Resistance, and Electric-Furnace Alloys. Report of Committee B-4, 198.
Electrodeposited Metallic Coatings. Report of Committee B-8, 265.

Alloys, Non-Ferrous—*continued.*
Evaluation of the Forming Properties in Bending of Five Commercial Sheet Aluminum Alloys—G. R. Gohn and S. M. Arnold, 1053. Discussion, 1062.
The Fatigue Properties of Beryllium-Copper Strip and Their Relation to Other Physical Properties—G. R. Gohn and S. M. Arnold, 741. Discussion, 776.
The Fatigue Strength of Lap Joints in Some Magnesium Sheet Alloys—H. J. Grover and L. R. Jackson. Summary of Proceedings of the Symposium on Testing of Parts and Assemblies, 852.
The Fatigue Strength of Some Magnesium Sheet Alloys—L. R. Jackson and H. J. Grover, 783. Discussion, 796.
Fatigue Tests on Some Additional Copper Alloys—Alton R. Anderson, Emery F. Swan, and Earl W. Palmer, 678. Discussion, 691.
Influence of Strain Rate and Temperature on the Mechanical Properties of Monel Metal and Copper—D. J. McAdam, Jr., G. W. Geil, and D. H. Woodard, 902.
Investigation of Materials for Marine Propellers—William C. Stewart and W. Lee Williams, 836.
Investigation of Methods of Determining the Weight or Average Thickness of Tin-Coated Copper and Brass—K. R. Hanna. Published in ASTM BULLETIN, No. 143, December, 1946, p. 35.
Light Metals and Alloys, Cast and Wrought. Report of Committee B-7, 259.
Metallography. Report of Committee E-4, 486.
Non-Ferrous Metals and Alloys. Report of Committee B-2, 191.
The Notch Sensitivity in Fatigue Loading o Some Magnesium-Base and Aluminum-Base Alloys—George H. Found, 715. Discussion, 738.
The Notch Sensitivity in Static and Impact Loading of Some Magnesium-Base and Aluminum-Base Alloys—J. P. Doan and J. C. McDonald, 1097.
A Permeameter for Metals Used in Cathode-Ray and Television Tubes—Howard J. Evans, 1119.
Recommendations Affecting Standards for Copper and Copper Alloys, Cast and Wrought. Appendix, Report of Committee B-5, 209.
Report of Subcommittee III on Tin- and Lead-Base Die Castings. Committee B-6, 233.
Report of Subcommittee V on Exposure and Corrosion Tests. Committee B-6, 244.
Spectrographic Analysis. Report of Committee E-2, 476.
Symposium on Atmospheric Exposure Tests on Non-Ferrous Metals—Summary of Proceedings of the Pittsburgh Spring Meeting, 1580.
A Study of the Geometry of the Tension-Impact Specimen—N. A. Kahn and E. A. Imbembo, 1179. Discussion, 1191.
Tensile and Creep Strengths of Some Magnesium-Base Alloys at Elevated Temperatures—A. A. Moore and J. C. McDonald, 970. Discussion, 989.
Wires for Electrical Conductors. Report of Committee B-1, 188.

Aluminum.
Aluminum-Base Die-Casting Alloys Nos. IVa, Va, and V. Report of Subcommittee I, Committee B-6, 225.
Atmospheric and Indoor Aging Studies on Some Aluminum and Zinc-Base Die-Casting Alloys—G. R. Gohn and Lucille E. Menges, 1064. Discussion, 1095.
Chemical Analysis of Metals. Report of Committee E-3, 478.
Compressive Properties of Aluminum Alloy Sheet at Elevated Temperatures—Alan E. Flanagan, Leslie F. Tedsen, and John E. Dorn, 951. Discussion, 968.
Compressive Stress-Strain Properties of Some Aircraft Materials—P. E. Sandorff and R. K. Dillon, 1039.
Die-Cast Metals and Alloys. Report of Committee B-6, 222.
Evaluation of the Forming Properties in Bending of Five Commercial Sheet Aluminum Alloys—G. R. Gohn and S. M. Arnold, 1053. Discussion, 1062.
Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 154.
Filler Metal. Report of Joint Committee.

Published in ASTM BULLETIN, No. 141, August, 1946, p. 56.
Light Metals and Alloys, Cast and Wrought. Report of Committee B-7, 259.
The Notch Sensitivity in Fatigue Loading of Some Magnesium-Base and Aluminum-Base Alloys—George H. Found, 715. Discussion, 738.
The Notch Sensitivity in Static and Impact Loading of Some Magnesium-Base and Aluminum-Base Alloys—J. P. Doan and J. C. McDonald, 1097.
Report of Subcommittee V on Exposure and Corrosion Tests. Committee B-6, 244.
A Study of the Geometry of the Tension-Impact Specimen—N. A. Kahn and E. A. Imbembo, 1179. Discussion, 1191.
Symposium on Atmospheric Exposure Tests on Non-Ferrous Metals—Summary of Proceedings of the Pittsburgh Spring Meeting, 1580.
Wartime Materials Developments and the Postwar World—J. C. DeHaven. Published in ASTM BULLETIN, No. 138, January, 1946, p. 17.

Amaloy Coatings.

Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 154.

Analytical Chemistry.

See **Chemical Analysis; Spectrographic Analysis.**
(Methods of analysis, testing, etc., are also indexed under the materials and subjects covered by them.)

Annapolis Exposure Tests.

Report on Inspection of Annapolis Tests. Report of Subcommittee III, Committee A-5, 146.

Annual Meeting.

Annual Report of the Executive Committee, 41.
Summary of Proceedings of the Forty-ninth Annual Meeting, 1.

Anodic Coatings.

Light Metals and Alloys, Cast and Wrought. Report of Committee B-7, 259.

Anthracite.

See **Coal.**

Armor.

Wartime Materials Developments and the Postwar World—J. C. DeHaven. Published in ASTM BULLETIN, No. 138, January, 1946, p. 17.

Aromatic Hydrocarbons.

Industrial Aromatic Hydrocarbons. Report of Committee D-16, 442.
Proposed Method of Test for Aromatic Hydrocarbons in Mixtures with Naphthenes and Paraffins by Silica Gel Adsorption. Appendix III, Report of Committee D-2, 356.

Asbestos.

Textile Materials. Report of Committee D-13, 428.

Asbestos Cement Products.

Report of Administrative Committee on Standards. Appendix I, Annual Report of the Executive Committee, 79.

Asphalt.

Bituminous Waterproofing and Roofing Materials. Report of Committee D-8, 389.
Concrete Flooring with Asphalt Admixture—F. O. Anderegg. Published in ASTM BULLETIN, No. 143, December, 1946, p. 11. Discussion, p. 15.
Development of a Method of Test for Soil Bituminous Mixtures—E. O. Rhodes and P. F. Phelan, 1416. Discussion, 1429.
Road and Paving Materials. Report of Committee D-4, 367.
Ten Years' Outdoor Exposure of Filled Asphalt Coatings on Saturated Felts—G. L. Oliensis. Published in ASTM BULLETIN No. 144, January, 1947, p. 32. Discussion, p. 41. Discussion continued, ASTM BULLETIN, No. 147, August, 1947.

Atmospheric Exposure.

See also **Corrosion; Weathering.**
Atmospheric and Indoor Aging Studies on

Atmospheric Exposure—*continued.*
Some Aluminum and Zinc-Base Die-Casting Alloys—G. R. Gohn and Lucille E. Menges, 1064. Discussion, 1095.
Symposium on Atmospheric Exposure Tests on Non-Ferrous Metals—Summary of Proceedings of the Pittsburgh Spring Meeting, 1580.
Symposium on Atmospheric Weathering of Corrosion-Resistant Steels:
Atmospheric Corrosion Tests on High-Chromium Steels—W. O. Binder and C. M. Brown, 593. Discussion, 609.
Corrosion-Resistant Steel for Architectural and Structural Applications—H. A. Grove, 610. Discussion, 614.
Atmospheric Corrosion Tests of Corrosion-Resistant Steel Wires—A. P. Jahn, 618.
Corrosion-Resistant Steel Sheet in Marine Atmospheres—Willard Mutchler, 621. Discussion, 640.
Atmospheric Corrosion Tests on Corrosion-Resistant Steel—Grant L. Snair, Jr., 642.
Weathering Behavior of Corrosion-Resistant Steel Insect Screens—W. A. Wesley and H. R. Copson, 652. Discussion, 666.
Results of 15 Years' Exposure on Corrosion-Resistant Steels—I. V. Williams and K. G. Compton, 673.

Axles.

Automotive Rear Axles and Means of Improving Their Fatigue Resistance—O. J. Horger and C. H. Lipson. Summary of Proceedings of the Symposium on Testing of Parts and Assemblies, 852.

B

Bacteriological Examination.

Proposed Method of Test for the Bacteriological Examination of Paper and Paperboard. Appendix, Report of Committee D-6, 380.

Bast and Leaf Fibers.

Textile Materials. Report of Committee D-13, 428.

Bearings.

Lubricants for Synchronous Unit Bearings—Jonathan L. Snead and Henry Gisser. Published in ASTM BULLETIN, No. 141, August, 1946, p. 45. Discussion, ASTM BULLETIN, No. 147, August, 1947.
Metal Powders and Metal Powder Products. Report of Committee B-9, 268.
Non-Ferrous Metals and Alloys. Report of Committee B-2, 191.
Summary of Proceedings of the Symposium on Testing of Bearings, 853.

Bending Failures.

Evaluation of the Forming Properties in Bending of Five Commercial Sheet Aluminum Alloys—G. R. Gohn and S. M. Arnold, 1053. Discussion, 1062.

Benzene.

Industrial Aromatic Hydrocarbons. Report of Committee D-16, 442.

Bituminous Coal.

See **Coal.**

Bituminous Materials.

See also **Petroleum Products; Roofing Materials.**
Development of a Method of Test for Soil Bituminous Mixtures—E. O. Rhodes and P. F. Phelan, 1416. Discussion, 1429.
Laboratory Investigation of Anti-Stripping Admixtures Used for Promoting Wetting Power and Adhesion Between Bitumens and Aggregates—John C. Sprague, 1377. Discussion, 1407.

Boiler Feedwater.

Water for Industrial Uses. Report of Committee D-19, 454.

Bomb Oxidation Tests.

Bomb Oxidation Tests of Grease and Storage Life of Grease-Lubricated Mechanisms—H. Gisser and F. L. Meshkov. Published in ASTM BULLETIN, No. 140, May, 1946, p. 57.

Bond.

Permeability of Brick-Mortar Assemblages—John W. McBurney, M. Arnold Copeland, and Russel C. Brink, 1333. Discussion, 1349.

Boxes.

Paper and Paper Products. Report of Committee D-6, 375.

Shipping Containers. Report of Committee D-10, 409.

Brass.

Chemical Analysis of Metals. Report of Committee E-3, 478.

Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, 202.

Die-Cast Metals and Alloys. Report of Committee B-6, 222.

Investigation of Methods of Determining the Weight or Average Thickness of Tin-Coated Copper and Brass.—K. R. Hanna. Published in ASTM BULLETIN, No. 143, December, 1946, p. 35.

A Method for Predicting Failure of Metals—P. E. Cavanagh. Published in ASTM BULLETIN, No. 143, December, 1946, p. 30. Discussion, p. 33.

Recommendations Affecting Standards for Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, Appendix, 209.

A Study of the Geometry of the Tension-Impact Specimen—N. A. Kahn and E. A. Imbembo, 1179. Discussion, 1191.

Brick.

Manufactured Masonry Units. Report of Committee C-15, 321.

Permeability of Brick-Mortar Assemblages—John W. McBurney, M. Arnold Copeland, and Russel C. Brink, 1333. Discussion, 1349.

Refractories. Report of Committee C-8, 302.

Brinell Hardness.

See **Hardness Testing.**

Bronze.

See also **Copper.**

Chemical Analysis of Metals. Report of Committee E-3, 478.

Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, 202.

Investigation of Materials for Marine Propellers—William C. Stewart and W. Lee Williams, 836.

Recommendations Affecting Standards for Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, Appendix, 209.

Building Brick.

See **Brick.**

Building Codes.

Some Problems and Trends in Building Codes—George N. Thompson. Published in ASTM BULLETIN, No. 141, August, 1946, p. 33.

Building Constructions.

Methods of Testing Building Constructions. Report of Committee E-6, 489.

Building Stones.

Natural Building Stones. Report of Committee C-18, 325.

C

Cable.

Wires for Electrical Conductors. Report of Committee B-1, 188.

Cadmium Coatings.

Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 154.

Calorized Coatings.

Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 154.

Carbon-Molybdenum Steel.

See **Alloy Steel.**

Cast Iron.

The Brinell Hardness of Gray Cast Iron and Its Relation to Some Other Properties—J. T. MacKenzie, 1025. Discussion, 1037.
Cast Iron. Report of Committee A-3, 138.

Castings.

See also **Alloy Steel; Aluminum; Brass; Bronze; Copper; Die Castings; Magnesium; Steel.**
Atmospheric and Indoor Aging Studies on Some Aluminum and Zinc-Base Die-Casting Alloys—G. R. Gohn and Lucille E. Menges, 1064. Discussion, 1095.
Wartime Materials Developments and the Postwar World—J. C. DeHaven. Published in ASTM BULLETIN, No. 138, January, 1946, p. 17.

Cathode-Ray Tube Metals.

A Permeameter for Metals Used in Cathode-Ray and Television Tubes—Howard J. Evans, 1119.

Cement.

Cement. Report of Committee C-1, 271.
Effect of Alkalies in Portland Cement on Durability of Concrete, R. F. Blanks. Report of Working Committee of Committee C-1. Published in ASTM BULLETIN, No. 142, October, 1946, p. 28.
The Influence of Gypsum on the Hydration and Properties of Portland Cement Pastes—William Lerch, 1252. Discussion, 1293.
A Method of Particle Size Determination of Soils, Cement, etc., by Means of a Chainomatic Specific Gravity Balance—Eugene V. Barrett, 1355. Discussion, 1373.
Proposed Method of Test for Sulfate Resistance of Portland Cement. Appendix III, Report of Committee C-1, 288.
Report of Working Committee on Sulfate Resistance. Appendix II, Report of Committee C-1, 278.
Scope of Cooperative Tests of Cement Mortars Sponsored by the Working Committee on Strength. Appendix I, Report of Committee C-1, 277.
Thermal Insulating Materials. Report of Committee C-16, 323.

Cemented Carbides.

See **Metal Powders.**

Ceramics.

Alloys and Ceramic Materials for High-Temperature Service—Howard C. Cross. Summary of Proceedings of the Symposium on Materials for Gas Turbines, 854.

Chemical Analysis.

The Application of the Mass Spectrometer to Chemical Analysis—A. Keith Brewer. Published in ASTM BULLETIN, No. 140, May, 1946, p. 38.
Cement. Report of Committee C-1, 271.
Chemical Analysis of Metals. Report of Committee E-3, 478.
Report on Determination of Soap, Free Fat, and Mineral Oil in Grease—Chemical and General Tests, prepared by Gus Kaufman, Section 1 of Committee D-2. Published in ASTM BULLETIN, No. 141, August, 1946, p. 54.
Spectrographic Analysis. Report of Committee E-2, 476.

Chromium.

Electrodeposited Metallic Coatings. Report of Committee B-8, 265.
Metallurgy of High-Temperature Alloys Used on Current Gas Turbine Designs—F. S. Badger, Jr. and W. O. Sweeney, Jr. Summary of Proceedings of the Symposium on Materials for Gas Turbines, 854.

Chromium-Nickel Alloys.

See **Alloy Steel.**

Cloth Laminates.

Tension and Torsion Creep Properties of Cloth Laminates—Joseph Marin. Published in ASTM BULLETIN, No. 143, December, 1946, p. 38. Discussion, p. 47.

Coal.

Coal and Coke. Report of Committee D-5, 372.

Coated Fabrics.

See **Rubber Products.**

Coatings.

See also **Electrodeposited Coatings, Paint.**

The Falling Sand Abrasion Tester—C. C. Hipkins and R. J. Phair. Published in ASTM BULLETIN, No. 143, December, 1946, p. 18.

Investigation of Methods of Determining the Weight or Average Thickness of Tin-Coated Copper and Brass—K. R. Hanna. Published in ASTM BULLETIN, No. 143, December, 1946, p. 35.

Coke.

Coal and Coke. Report of Committee D-5, 372.

Colloids.

A Method of Determining the Particle Size of Colloids from Sedimentation Data Obtained with the Sharples Supercentrifuge—Serge A. Loukomsky and S. James O'Brien, 1437. Discussion, 1451.

Compression Testing.

Compressive Properties of Aluminum Alloy Sheet at Elevated Temperatures—Alan E. Flanagan, Leslie F. Tedsen, and John E. Dorn, 951. Discussion, 968.

Compressive Stress-Strain Properties of Some Aircraft Materials—P. E. Sandorff and R. K. Dillon, 1039.

Fatigue Tests of Rail Steel Under Compressive Stress—R. S. Jensen and H. F. Moore, 799. Discussion, 807.

Modulus of Elasticity of Aggregates and Its Effect on Concrete—H. A. LaRue, 1298. Discussion, 1310.

Concrete.

Concrete and Concrete Aggregates. Report of Committee C-9, 312.

Concrete Flooring with Asphalt Admixture—F. O. Anderegg. Published in ASTM BULLETIN, No. 143, December, 1946, p. 11. Discussion, p. 15.

Effect of Alkalies in Portland Cement on Durability of Concrete, R. F. Blanks. Report of Working Committee of Committee C-1. Published in ASTM BULLETIN, No. 142, October, 1946, p. 28.

Fifth Sanford E. Thompson Award. Summary of Proceedings of the Forty-ninth Annual Meeting, 23. Report of Committee C-9, 312.

Manufactured Masonry Units. Report of Committee C-15, 321.

Modulus of Elasticity of Aggregates and Its Effect on Concrete—H. A. LaRue, 1298. Discussion, 1310.

A Study of Durability and Void Characteristics of Concretes Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

Symposium on Freezing and Thawing Tests of Concrete.

Considerations Involved in the Making of Freezing-and-Thawing Tests on Concrete—M. O. Withey, 1198.

Discussion, 1208.

The Use of the Dynamic Modulus of Elasticity in Predicting the 28-Day Flexural Strength of Concrete—Edmund F. Preece, 1311.

Conditioning.

Electrical Insulating Materials. Report of Committee D-9, 393.

Methods of Testing. Report of Committee E-1, 470.

Consistency.

Methods of Testing. Report of Committee E-1, 470.

Consumer Goods.

Laboratory Testing of Consumer Goods—A. T. Chameroy. Published in ASTM BULLETIN No. 140, May, 1946, p. 23.

Report of Administrative Committee on Ultimate Consumer Goods. Appendix IV, Annual Report of the Executive Committee, 91.

Contact Metals.

Calculation of Electrical Contacts Under Ideal Conditions—Erle I. Shobert II, 1126. Discussion, 1145.

Electrical-Heating, Electrical-Resistance and Electric Furnace Alloys. Report of Committee B-4, 198.

Containers.

Paper and Paper Products. Report of Committee D-6, 375.
Shipping Containers. Report of Committee D-10, 409.

Copper.

Chemical Analysis of Metals. Report of Committee E-3, 478.
Copper and Copper Alloys, Cast and Wrought. Report of Committee B-5, 202.
Electrodeposited Metallic Coatings. Report of Committee B-8, 265.
The Fatigue Properties of Beryllium-Copper Strip and Their Relation to Other Physical Properties—G. R. Gohn and S. M. Arnold, 741. Discussion, 776.
Fatigue Tests on Some Additional Copper Alloys—Alton R. Anderson, Emery F. Swan, and Earl W. Palmer, 678. Discussion, 691.
Influence of Strain Rate and Temperature on the Mechanical Properties of Monel Metal and Copper—D. J. McAdam, Jr., G. W. Geil, and D. H. Woodard, 902.
Investigation of Methods of Determining the Weight or Average Thickness of Tin-Coated Copper and Brass—K. R. Hanna. Published in ASTM BULLETIN, No. 143, December, 1946, p. 35.

Wartime Materials Developments and the Postwar World—J. C. DeHaven. Published in ASTM BULLETIN, No. 138, January, 1946, p. 17.

Magnetic Testing.

Magnetic Properties. Report of Committee A-6, 168.
What Is New In Science and Engineering—Everett S. Lee. Published in ASTM BULLETIN, No. 141, August, 1946, p. 24.

Marburg Lecture.

Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello. 493.

Masonry Materials.

Manufactured Masonry Units. Report of Committee C-15, 321.
Mortars for Unit Masonry. Report of Committee C-12, 318.
Permeability of Brick-Mortar Assemblages—John W. McBurney, M. Arnold Copeland, and Russel C. Brink, 1333. Discussion, 1349.

Materials Engineering.

Materials Engineering at Home and Abroad—J. R. Townsend. Published in ASTM BULLETIN, No. 140, May, 1946, p. 19.

Membership.

Annual Report of the Executive Committee, 41.

Metal Powders.

Metal Powders and Metal Powder Products. Report of Committee B-9, 268.

Metal Protective Coatings.

See also **Electrodeposited Coatings.**
Investigation of Methods of Determining the Weight or Average Thickness of Tin on Tin-Coated Copper and Brass—K. R. Hanna. Published in ASTM BULLETIN, No. 143, December, 1946, p. 35.
Round Table Discussion on Problems Encountered in Testing for the Humidity and Immersion Resistance of Paints on Steel. Published in ASTM BULLETIN, No. 142, October, 1946.
Principles of Immersion and Humidity Testing of Metal Protective Paints—A. C. Elm, p. 9.
Discussion, p. 13.

Metallic Ion Stability.

The Evaluation of Surface-Active Agents—Jay C. Harris. Published in ASTM BULLETIN, No. 140, May, 1946, p. 76. Continued in ASTM BULLETIN, No. 141, August, 1946, p. 49.

Metallography.

Mechanical Methods of Testing—Analysis of the State of Stress in the Neck of a Tension Test Specimen—N. N. Davidenkov and N. I. Spiridonova, 1147. Discussion, 1175.

Metallography—*continued.*

Metallography. Report of Committee E-4, 486.

A Study of the Tension Test—Earl R. Parker, Harmer E. Davis, and Alan E. Flanigan, 1159. Discussion, 1175.

Methods of Testing.

(Papers and reports covering methods of analysis, sampling, testing, etc., are indexed under the materials and subjects covered by them.)

Methods of Testing. Report of Committee E-1, 470.

Mica.

Electrical Insulating Materials. Report of Committee D-9, 393.

Electrical Quality Classification of Raw Mica by a Rapid, Direct-Reading Test Method—Kenneth G. Cornélée, 1486. Discussion, 1496.

Modulus of Elasticity.

Modulus of Elasticity of Aggregates and Its Effect on Concrete—H. A. LaRue, 1298. Discussion, 1310.

A Study of Durability and Void Characteristics of Concretes Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

The Use of the Dynamic Modulus of Elasticity in Predicting the 28-Day Flexural Strength of Concrete—Edmund F. Preece, 1311.

Modulus of Rupture.

A Study of Durability and Void Characteristics of Concretes Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

Moisture Content.

Effect of Temperature and Humidity on Mechanical Properties of Molded Cellulose Acetate Plastics—W. E. Welch, R. F. Hayes, T. S. Carswell, and H. K. Nason, 1452.

Methods for Determining the Specific Gravity of Wood and Wood-Base Materials—L. J. Markwardt and Benson H. Paul, 1520.

Molded Insulating Materials.

See **Electrical Insulating Materials; Plastics; Thermal Insulating Materials.**

Monel Metal.

Influence of Strain Rate and Temperature on the Mechanical Properties of Monel Metal and Copper—D. J. McAdam, Jr., G. W. Geil, and D. H. Woodard, 902.

Mortar.

The Influence of Gypsum on the Hydration and Properties of Portland Cement Pastes—William Lerch, 1252. Discussion, 1293.

Lime. Report of Committee C-7, 301.

Mortars for Unit Masonry. Report of Committee C-12, 318.

Permeability of Brick-Mortar Assemblages—John W. McBurney, M. Arnold Copeland, and Russel C. Brink, 1333. Discussion, 1349.

Proposed Method of Test for Sulfate Resistance of Portland Cement. Appendix III, Report of Committee C-1, 288.

Report of Working Committee on Sulfate Resistance. Appendix II, Report of Committee C-1, 278.

Scope of Cooperative Tests of Cement Mortars Sponsored by the Working Committee on Strength. Appendix I, Report of Committee C-1, 277.

Motor Fuel.

See **Gasoline; Petroleum Products.**

Motor Oils.

See **Lubricants; Petroleum Products.**

N

Naphthenes.

Proposed Method of Test for Aromatic Hydrocarbons in Mixtures with Naphthenes and Paraffins by Silica Gel Adsorption. Appendix III, Report of Committee D-2, 356.

Natural Building Stone.

See **Aggregates; Stone.**

Naval Stores.

Naval Stores. Report of Committee D-17, 446.

Nickel.

Electrodeposited Metallic Coatings. Report of Committee B-8, 265.
Non-Ferrous Metals and Alloys. Report of Committee B-2, 191.
Symposium on Atmospheric Exposure Tests on Non-Ferrous Metals—Summary of Proceedings of the Pittsburgh Spring Meeting, 1580.

Nickel-Chromium Alloys.

See **Alloy Steel.**

Nickel-Copper Alloys.

Non-Ferrous Metals and Alloys. Report of Committee B-2, 191.

Notch Sensitivity.

The Notch Sensitivity in Fatigue Loading of Some Magnesium-Base and Aluminum-Base Alloys—George H. Found, 715. Discussion, 738.
The Notch Sensitivity in Static and Impact Loading of Some Magnesium-Base and Aluminum-Base Alloys—J. P. Doan and J. C. McDonald, 1097.

Notching Test Specimens.

Method of Notching Impact Test Specimens—S. E. Siemen. Published in ASTM BULLETIN, No. 139, March, 1946, p. 45.

O

Oils.

See also **Fuel Oil; Lubricants; Petroleum Products; Transformer Oil.**
Laboratory Determined Pour Points of Lubricating Oils as Related to Ability to Flow Under Field Storage Conditions—J. J. Giammaria. Published in ASTM BULLETIN, No. 138, January, 1946, p. 44.
Peacetime Heating Oil Classifications—M. A. Powers. Published in ASTM BULLETIN, No. 140, May, 1946, p. 72.
Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello, 493.
Summary of Proceedings of the Symposium on Oil Procurement Practices, 1578.
Water Determination in New and Used Insulating Oils by Doble Method—Frank C. Doble, 1475. Discussion, 1482.

Oxychloride Cement.

Report of Administrative Committee on Standards. Appendix I, Annual Report of the Executive Committee, 79.

P

Paint.

Correlating Laboratory Accelerated Tests and Outdoor Tests by Means of Instrument Testing for Change in the Physical Properties of Paints—Dave M. Williams. Published in ASTM BULLETIN, No. 144, January, 1947, p. 49.
The Falling Sand Abrasion Tester—C. C. Hipkins and R. J. Phair. Published in ASTM BULLETIN, No. 143, December, 1946, p. 18.
A Method of Determining the Particle Size of Colloids from Sedimentation Data Obtained with the Sharples Supercentrifuge—Serge A. Loukomsky and S. James O'Brien, 1437. Discussion, 1451.
Paint, Varnish, Lacquer, and Related Products. Report of Committee D-1, 326.
Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello, 493.
Round Table Discussion on Problems Encountered in Testing for the Humidity and Immersion Resistance of Paints on Steel. Published in ASTM BULLETIN, No. 142, October, 1946.
Principles of Immersion and Humidity Testing of Metal Protective Paints—A. C. Elm, p. 9.
Discussion, p. 13.

Paper.

Electrical Insulating Materials. Report of Committee D-9, 393.
Paper and Paper Products. Report of Committee D-6, 375.
Proposed Method of Test for the Bacteriological Examination of Paper and Paperboard. Appendix, Report of Committee D-6, 380.
Shipping Containers. Report of Committee D-10, 409.

Papers and Publications.

Annual Report of the Executive Committee, 41.

Report of Administrative Committee on Papers and Publications. Appendix III, Annual Report of the Executive Committee, 88.

Paraffins.

Proposed Method of Test for Aromatic Hydrocarbons in Mixtures with Naphthenes and Paraffins by Silica Gel Adsorption. Appendix III, Report of Committee D-2, 356.

Parkerized Coatings.

Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 154.

Particle Size.

A Method of Determining the Particle Size of Colloids from Sedimentation Data Obtained with the Sharples Supercentrifuge—Serge A. Loukomsky and S. James O'Brien, 1437. Discussion, 1451.

A Method of Particle Size Determination of Soils, Cement, etc., by Means of a Chainomatic Specific Gravity Balance—Eugene V. Barrett, 1355. Discussion, 1373.

Methods of Testing. Report of Committee E-1, 470.

Parts and Assemblies.

Pneumatic Fatigue Machines—F. B. Quinlan, 846. Discussion, 851.

Some Applications of Simulated Service Testing to Nonmetallic Materials—Alan D. Freas. Published in ASTM BULLETIN, No. 141, August, 1946, p. 35.

Summary of Proceedings of the Symposium on Testing of Bearings, 853.

Summary of Proceedings of the Symposium on Testing of Parts and Assemblies, 852.

Passivation.

Report on Passivation of Corrosion-Resistant Steels, F. L. LaQue. Appendix I, Report of Committee A-10, 175.

Paving Materials.

See **Aggregates; Brick; Cement; Concrete; Soils.**

Penetration.

See **Consistency.**

Permeability.

See also **Magnetic Testing.**

Permeability of Brick-Mortar Assemblages—John W. McBurney, M. Arnold Copeland, and Russel C. Brink, 1333. Discussion, 1349.

A Study of Durability and Void Characteristics of Concretes Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

Permeameter.

A Permeameter for Metals Used in Cathode-Ray and Television Tubes—Howard J. Evans, 1119.

Petroleum Products.

From Research—New Knowledge, New Materials, New Methods—T. A. Boyd. Published in ASTM BULLETIN, No. 138, January, 1946, p. 11.

High-Temperature, High-Speed Testing of Lubricating Greases—J. F. Macphearson. Published in ASTM BULLETIN, No. 140, May, 1946, p. 63.

Laboratory Determined Pour Points of Lubricating Oils as Related to Ability to Flow Under Field Storage Conditions—J. J. Giammaria. Published in ASTM BULLETIN, No. 138, January, 1946, p. 44.

Peacetime Heating Oil Classification, M. A. Powers. Published in ASTM BULLETIN, No. 140, May, 1946, p. 72.

Petroleum Products and Lubricants. Report of Committee D-2, 337.

Proposed Method of Test for Aromatic Hydrocarbons in Mixtures with Naphthenes and Paraffins by Silica Gel Adsorption. Appendix III, Report of Committee D-2, 356.

Proposed Method of Test for Phosphorus in Organic Materials. Appendix II, Report of Committee D-2, 352.

Proposed Method of Test for Sulfated Residue of Lubricating Oils. Appendix I, Report of Committee D-2, 349.

Summary of Proceedings of the Symposium on Oil Procurement Practices, 1578.

Report on Determination of Soap, Free Fat, and Mineral Oil in Grease—Chemical and General Tests, prepared by Gus Kaufman, Section 1 of Committee D-2. Published in ASTM BULLETIN, No. 141, August, 1946, p. 54.

pH Value.

Methods of Testing. Report of Committee E-1, 470.

Summary of Proceedings of the Symposium on pH Measurement, 1577.

Phenolic Materials.

See **Electrical Insulating Materials; Plastics.**

Phosphorus Test.

Proposed Method of Test for Phosphorus in Organic Materials. Appendix II, Report of Committee D-2, 352.

Photoelectric Recorder.

What Is New In Science and Engineering—Everett S. Lee. Published in ASTM BULLETIN, No. 141, August, 1946, p. 24.

Photometric Methods.

Chemical Analysis of Metals. Report of Committee E-3, 478.

Pigments.

A Method of Determining the Particle Size of Colloids from Sedimentation Data Obtained with the Sharples Supercentrifuge—Serge A. Loukomsky and S. James O'Brien, 1437. Discussion, 1451.

Paint, Varnish, Lacquer, and Related Products. Report of Committee D-1, 326.

Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello, 493.

Pine Oil.

Naval Stores. Report of Committee D-17, 446.

Plastic Deformation.

A Method for Predicting Failure of Metals—P. E. Cavanagh. Published in ASTM BULLETIN, No. 143, December, 1946, p. 30. Discussion, p. 33.

Plastic Refractories.

See **Refractories.**

Plasticizers.

Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello, 493.

Plastics.

See also **Electrical Insulating Materials.**

The Effect of High Humidity and Fungi on the Insulation Resistance of Plastics—John Leutritz, Jr., and David B. Herrmann. Published in ASTM BULLETIN, No. 138, January, 1946, p. 25.

Effect of Temperature and Humidity on Mechanical Properties of Molded Cellulose Acetate Plastics—W. E. Welch, R. F. Hayes, T. S. Carswell, and H. K. Nason, 1452.

Effect of Weathering on Insulation Resistance of Plastics—Leslie H. Campbell, Arthur H. Falk, and Robert Burns, 1465. Discussion, 1474.

Electrical Insulating Materials. Report of Committee D-9, 393.

An Expedient Method for the Preparation of Cantilever-Beam Fatigue Specimens—R. D. DeWaard. Published in ASTM BULLETIN, No. 141, August, 1946, p. 40.

Factors Affecting the Tensile Strength of Injection-Molded Ethyl Cellulose Test Specimens—W. E. Gloor, W. C. Goggin, and H. K. Haviland. Published in ASTM BULLETIN, No. 140, May, 1946, p. 45.

Laboratory Testing of Plastics—Small-Scale Flexure Test—Owen W. Ward and A. Bailey. Published in ASTM BULLETIN, No. 138, January, 1946, p. 33.

Laboratory Testing of Plastics—Small-Scale Impact Test—A. Bailey and Owen W. Ward. Published in ASTM BULLETIN, No. 140, May, 1946, p. 50. Discussion, ASTM BULLETIN, No. 142, October, 1946, p. 51.

Materials Engineering at Home and Abroad—J. R. Townsend. Published in ASTM BULLETIN, No. 140, May, 1946, p. 19.

Plastics. Report of Committee D-20, 461.

Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello, 493.

Plastics—*continued*.
Recommendations Affecting Standards for Plastics. Appendix, Report of Committee D-20, 465.
Tension and Torsion Creep Properties of Cloth Laminates—Joseph Marin. Published in ASTM BULLETIN, No. 143, December, 1946, p. 38. Discussion, p. 47.
Wartime Materials Developments and the Postwar World—J. C. DeHaven. Published in ASTM BULLETIN, No. 138, January, 1946, p. 17.

Plating.
See **Electrodeposited Coatings.**

Plywood.
Fatigue of Wood and Glued-Wood Constructions—W. C. Lewis, 814. Discussion, 833.
Methods for Determining the Specific Gravity of Wood and Wood-Base Materials—L. J. Markwardt and Benson H. Paul, 1520.
Wood. Report of Committee D-7, 385.

Polarographic Methods.
Chemical Analysis of Metals. Report of Committee E-3, 478.

Portland Cement.
See **Cement.**

Pour Point.
Laboratory Determined Pour Point of Lubricating Oils as Related to Ability to Flow Under Field Storage Conditions—J. J. Giammaria. Published in ASTM BULLETIN, No. 138, January, 1946, p. 44.

President's Address and Talks.
The Challenge of National and International Affairs to the Engineer, Annual Address by the President, J. R. Townsend, 36.

Filler Metal. Report of Joint Committee. Published in ASTM BULLETIN, No. 141, August, 1946, p. 56.

Investigation of Materials for Marine Propellers—William C. Stewart and W. Lee Williams, 836.

Iron-Chromium, Iron-Chromium-Nickel, and Related Alloys. Report of Committee A-10, 171.

Magnetic Properties. Report of Committee A-6, 168.

Metallography. Report of Committee E-4, 486.

A Permeameter for Metals Used in Cathode-Ray and Television Tubes—Howard J. Evans, 1119.

Recommendations Affecting Standards on Steel. Appendix, Report of Committee A-1, 114.

Report on Inspection of Annapolis Tests. Report of Subcommittee III, Committee A-5, 146.

Report on the Inspection of the Corrosion-Resisting Steel Deck Houses on the U. S. Navy Destroyers Farragut and Alwyn. Appendix II, Report of Committee A-10, 179.

Report on Passivation of Corrosion-Resistant Steels, F. L. LaQue. Appendix I, Report of Committee A-10, 175.

The Spectrochemical Analysis of Steels with a Direct-Reading Instrument—M. F. Hasler, J. W. Kemp, and H. W. Dietert. Published in ASTM BULLETIN, No. 139, March, 1946, p. 22.

Steel. Report of Committee A-1, 98.

A Study of the Damaging Effect of Fatigue Stressing on X4130 Steel—J. A. Bennett, 693. Discussion, 712.

A Study of the Geometry of the Tension-Impact Specimen—N. A. Kahn and E. A. Imbembo, 1179. Discussion, 1191.

A Study of the Tension Test—Earl R. Parker, Harmer E. Davis, and Alan E. Flanigan, 1159. Discussion, 1175.

Symposium on Atmospheric Weathering of Corrosion-Resistant Steels:

Atmospheric Corrosion Tests on High-Chromium Steels—W. O. Binder and C. M. Brown, 593. Discussion, 609.

Corrosion-Resistant Steel for Architectural and Structural Applications—H. A. Grove, 610. Discussion, 614.

Atmospheric Corrosion Tests of Corrosion-Resistant Steel Wires—A. P. Jahn, 618.

Corrosion-Resistant Steel Sheet in Marine Atmospheres—Willard Mutchler, 621. Discussion, 640.

Atmospheric Corrosion Tests on Corrosion-Resistant Steel—Grant L. Snair, Jr., 642.

Weathering Behavior of Corrosion-Resistant Steel Insect Screens—W. A. Wesley and H. R. Copson, 652. Discussion, 666.

Results of 15 Years' Exposure Tests on Corrosion-Resistant Steels—I. V. Williams and K. G. Compton, 673.

Stone.

See also **Aggregates.**

Natural Building Stones. Report of Committee C-18, 325.

Storage Life.

Bomb Oxidation Tests of Grease and Storage Life of Grease-Lubricated Mechanisms—H. Gisser and F. L. Meshkov. Published in ASTM BULLETIN, No. 140, May, 1946, p. 57.

Stress Analysis.

Mechanical Methods of Testing—Analysis of the State of Stress in the Neck of a Tension Test Specimen—N. N. Davidenkov and N. I. Spiridonova, 1147. Discussion, 1175.

A Study of the Geometry of the Tension-Impact Specimen—N. A. Kahn and E. A. Imbembo, 1179. Discussion, 1191.

A Study of the Tension Test—Earl R. Parker, Harmer E. Davis, and Alan E. Flanigan, 1159. Discussion, 1175.

Summary of Proceedings of the Symposium on Testing of Parts and Assemblies, 852.

Structural Steel.

See **Steel.**

Sulfate Resistance.

Proposed Method of Test for Sulfate Resistance of Portland Cement. Appendix III, Report of Committee C-1, 288.

Report of Working Committee on Sulfate Resistance. Appendix II, Report of Committee C-1, 278.

Sulfated Residue.

Proposed Method of Test for Sulfated Residue of Lubricating Oils. Appendix I, Report of Committee D-2, 349.

Sulfonates, Petroleum.

See **Soaps and Detergents.**

Sulfur Cements.

Report of Administrative Committee on Standards. Appendix I, Annual Report of the Executive Committee, 79.

Summary of Proceedings.

Summary of Proceedings of the Forty-ninth Annual Meeting, 1.

Surface-Active Agents.

The Evaluation of Surface-Active Agents—Jay C. Harris. Published in ASTM BULLETIN, No. 140, May, 1946, p. 76. Continued in ASTM BULLETIN, No. 141, August, 1946, p. 49.

Susceptibility Tests.

Studies on Susceptibility of Casting Steels to Graphitization (Project No. 29), J. J. Kanter and E. A. Sticha. Appendix, Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, 182.

Synthetic Detergents.

See **Soaps and Detergents.**

Synthetic Rubber.

Direct Volume-Reading Jolly Balance—Alfred S. Berens. Published in ASTM BULLETIN, No. 140, May, 1946, p. 55.

Rubber and Rubber-Like Materials. Report of Committee D-11, 411.

Wartime Materials Developments and the Postwar World—J. C. Dehaven. Published in ASTM BULLETIN, No. 138, January, 1946, p. 17.

T

Tall Oil.

Naval Stores. Report of Committee D-17, 446.

Tapes.

Creep Tests on Some Extruded Lead and Lead-Alloy Sleeves and Tapes—G. R. Gohn, S. M. Arnold, and G. M. Bouton, 990. Discussion, 1021.

Tar.

See **Road Materials; Waterproofing Materials.**

Television Tube and Metals.

A Permeameter for Metals Used in Cathode-Ray and Television Tubes—Howard J. Evans, 1119.

Temperature, Effect of.

Compressive Properties of Aluminum Alloy Sheet at Elevated Temperatures—Alan E. Flanagan, Leslie F. Tedsen, and John E. Dorn, 951. Discussion, 968.

The Effect of Carbide Spheroidization upon the Rupture Strength and Elongation of Carbon-Molybdenum Steel—S. H. Weaver, 856. Discussion, 867.

Effect of Temperature and Humidity on Mechanical Properties of Molded Cellulose Acetate Plastics—W. E. Welch, R. F. Hayes, T. S. Carswell, and H. K. Nason, 1452.

Effect of Temperature on the Properties of Metals. Report of Joint Research Committee, 180.

Electrical-Heating, Electrical-Resistance, and Electric-Furnace Alloys. Report of Committee B-4, 198.

High-Temperature, High-Speed Testing of Lubricating Greases—J. F. Macphearson. Published in ASTM BULLETIN, No. 140, May, 1946, p. 63. Discussion, p. 70.

Influence of Strain Rate and Temperature on the Mechanical Properties of Monel Metal and Copper—D. J. McAdam, Jr., G. W. Geil, and D. H. Woodard, 902.

Resistance of Iron-Nickel-Chromium Alloys to Corrosion in Air at 1600 to 2200 F.—Anton deS. Brasunas, James T. Gow, and Oscar E. Harder, 870. Discussion, 894.

Studies on Susceptibility of Casting Steels to Graphitization (Project No. 29), J. J. Kanter and E. A. Sticha. Appendix, Report of Joint Research Committee on Effect of Temperature on the Properties of Metals, 182.

Summary of Proceedings of the Symposium on Materials for Gas Turbines, 854.

Tensile and Creep Strengths of Some Magnesium-Base Alloys at Elevated Temperatures—A. A. Moore and J. C. McDonald, 970. Discussion, 989.

Tension Testing at Elevated Temperatures—T. M. Blackmon, P. R. Nourse, and E. H. Plesset. Published in ASTM BULLETIN, No. 140, May, 1946, p. 32.

Templin Award.

Richard L. Templin Award. Summary of Proceedings of the Forty-ninth Annual Meeting, 9.

Tension Testing.

The Brinell Hardness of Gray Iron and Its Relation to Some Other Properties—J. T. Mackenzie, 1025. Discussion, 1037.

Effect of Temperature and Humidity on Mechanical Properties of Molded Cellulose Acetate Plastics—W. E. Welch, R. F. Hayes, T. S. Carswell, and H. K. Nason, 1452.

Factors Affecting the Tensile Strength of Injection-Molded Ethyl Cellulose Test Specimens—W. E. Gloor, W. C. Goggin, and H. K. Haviland. Published in ASTM BULLETIN, No. 140, May, 1946, p. 45.

Mechanical Methods of Testing—Analysis of the State of Stress in the Neck of a Tension Test Specimen—N. N. Davidenkov and N. I. Spiridonova, 1147. Discussion, 1175.

A Study of the Geometry of the Tension-Impact Specimen—N. A. Kahn and E. A. Imbendo, 1179. Discussion, 1191.

A Study of the Tension Test—Earl R. Parker, Harmer E. Davis, and Alan E. Flanigan, 1159. Discussion, 1175.

Tensile and Creep Strengths of Some Magnesium-Base Alloys at Elevated Temperature—A. A. Moore and J. C. McDonald, 970. Discussion, 989.

Tension Testing at Elevated Temperatures—T. M. Blackmon, P. R. Nourse, and E. H. Plesset. Published in ASTM BULLETIN, No. 140, May, 1946, p. 32.

Tension and Torsion Creep Properties of Cloth Laminates—Joseph Marin. Published in ASTM BULLETIN, No. 143, December, 1946, p. 38. Discussion, p. 47.

Test Specimens.

An Expedient Method for the Preparation of Cantilever-Beam Fatigue Specimens—R. D. DeWaard. Published in ASTM BULLETIN, No. 141, August, 1946, p. 40.

Improved Guides for Positioning of Impact Specimens—J. R. Spcer. Published in ASTM BULLETIN, No. 139, March, 1946, p. 46.

Mechanical Methods of Testing—Analysis of the State of Stress in the Neck of a Tension

Test Specimen—N. N. Davidenkov and N. I. Spiridonova, 1147. Discussion, 1175.
Method of Notching Impact Specimens—S. E. Siemen. Published in ASTM BULLETIN, No. 139, March, 1946, p. 45.
A Study of the Geometry of the Tension-Impact Specimen—N. A. Kahn and E. A. Imbembo, 1179. Discussion, 1191.
A Study of the Tension Test—Earl R. Parker, Harmer E. Davis, and Alan E. Flanigan, 1159. Discussion, 1175.

Testing Apparatus.

Methods of Testing. Report of Committee, E-1, 470.

Testing, Physical Methods of.

(Papers and reports covering methods of analysis, sampling, testing, etc., are indexed under the materials and subjects covered by them.)

Textiles.

Recommendations Affecting Standards on Textile Materials. Appendix, Report of Committee D-13, 434.
Textile Materials. Report of Committee D-13, 428.

Thermal Insulating Materials.

Thermal Insulating Materials. Report of Committee C-16, 323.

Thermometers.

Methods of Testing. Report of Committee E-1, 470.

Thermosetting and Thermoplastic Materials.

See **Plastics.**

Thermostat Metals.

Electrical-Heating, Electrical-Resistance, and Electric-Furnace Alloys. Report of Committee B-4, 198.

Thinners.

Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello, 493.

Tile.

Manufactured Masonry Units. Report of Committee C-15, 321.

Timber.

See **Wood.**

Tin.

Investigation on the Methods of Determining the Weight or Average Thickness of Tin on Tin-Coated Copper or Brass—K. R. Hanna. Published in ASTM BULLETIN, No. 143, December, 1946, p. 35.
Report of Subcommittee III on Tin- and Lead-Base Die Castings. Committee B-6, 233.

Toluene.

Industrial Aromatic Hydrocarbons. Report of Committee D-16, 442.

Torsion Testing.

Tension and Torsion Creep Properties of Cloth Laminates—Joseph Marin. Published in ASTM BULLETIN, No. 143, December, 1946, p. 38. Discussion, p. 47.

Total Immersion Tests.

See **Immersion Testing.**

Traffic Paint.

Paint, Varnish, Lacquer, and Related Products. Report of Committee D-1, 326.

Transformer Oil.

Electrical Insulating Materials. Report of Committee D-9, 393.

Turbosupercharger.

Summary of Proceedings of the Symposium on Materials for Gas Turbines, 854.

U

Ultimate Consumer Goods.

Laboratory Testing of Consumer Goods—A. T. Chameroy. Published in ASTM BULLETIN, No. 140, May, 1946, p. 23.
Report of Administrative Committee on Ultimate Consumer Goods. Appendix IV, Annual Report of the Executive Committee, 91.

V

Varnish.

Paint, Varnish, Lacquer, and Related Products. Report of Committee D-1, 326.

Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello, 493.

Varnished Cambric.

Dielectric Strength Measurements on Varnished Cambric—A. Rufolo and H. K. Graves, 1498.

Vibration Testing.

Electromagnetic Vibration Table—R. K. Bernhard and J. G. Barry. Published in ASTM BULLETIN, No. 139, March, 1946, p. 35.

Viscosity.

Laboratory Determined Pour Points of Lubricating Oils as Related to Ability to Flow Under Field Storage Conditions—J. J. Giammaria. Published in ASTM BULLETIN, No. 138, January, 1946, p. 44.

Void Characteristics.

A Study of Durability and Void Characteristics of Concretes Containing Admixtures, Principally of the Air-Entraining Type—F. B. Hornibrook, Howard Freiberger, and Albert Litvin, 1320.

W

Water.

Water for Industrial Uses. Report of Committee D-19, 454.

Water Retentivity.

Permeability of Brick-Mortar Assemblages—John W. McBurney, M. Arnold Copeland, and Russel C. Brink, 1333. Discussion, 1349.

Waterproofing Materials.

Bituminous Waterproofing and Roofing Materials. Report of Committee D-8, 389.

Weathering.

See also **Corrosion.**

Aluminum-Base Die-Casting Alloys Nos. IVa, Va, and V. Report of Subcommittee I, Committee B-6, 225.

Atmospheric and Indoor Aging Studies on Some Aluminum and Zinc-Base Die-Casting Alloys—G. R. Gohn and Lucille E. Menges, 1064. Discussion, 1095.

Corrosion of Non-Ferrous Metals and Alloys. Report of Committee B-3, 194.

Effect of Weathering on Insulation Resistance of Plastics—Leslie H. Campbell, Arthur H. Falk, and Robert Burns, 1465. Discussion, 1474.

Effects of Alkalies in Portland Cement on the Durability of Concrete, R. F. Blanks. Report of Working Committee of Committee C-1. Published in ASTM BULLETIN, No. 142, October, 1946, p. 28.

Field Tests of Metallic Coatings. Report of Subcommittee VIII, Committee A-5, 154.

Investigation of Materials for Marine Propellers—William C. Stewart and W. Lee Williams, 836.

Paint, Varnish, Lacquer, and Related Products. Report of Committee D-1, 326.

Protective Organic Coatings as Engineering Materials. Twentieth Edgar Marburg Lecture—Joseph J. Mattiello, 493.

Report on Inspection of Annapolis Tests. Report of Subcommittee III, Committee A-5, 146.

Report on the Inspection of the Corrosion-Resisting Steel Deck Houses on the U. S. Navy Destroyers Farragut and Alwyn. Appendix II, Report of Committee A-10, 179.

Report of Subcommittee V on Exposure and Corrosion Tests of Die Castings. Committee B-6, 244.

Symposium on Atmospheric Exposure Tests on Non-Ferrous Metals—Summary of Proceedings of the Pittsburgh Spring Meeting, 1580.

Symposium on Atmospheric Weathering of Corrosion-Resistant Steels:

Atmospheric Corrosion Tests on High-Chromium Steels—W. O. Binder and C. M. Brown, 593. Discussion, 609.

Corrosion-Resistant Steel for Architectural

and Structural Applications—H. A. Grove, 610. Discussion, 614.
Atmospheric Corrosion Tests of Corrosion-Resistant Steel Wires—A. P. Jahn, 618.
Corrosion-Resistant Steel Sheet in Marine Atmospheres—Willard Mutchler, 621. Discussion, 640.
Atmospheric Corrosion Tests on Corrosion-Resistant Steel—Grant L. Snair, Jr., 642.
Weathering Behavior of Corrosion-Resistant Steel Insect Screens—W. A. Wesley and H. R. Copson, 652. Discussion, 666.
Results of 15 Years' Exposure Tests on Corrosion-Resistant Steels—I. V. Williams and K. G. Compton. 673.
Symposium on Freezing-and-Thawing Tests of Concrete.
Considerations Involved in the Making of Freezing-and-Thawing Tests on Concrete—M. O. Withey, 1198.
Discussion, 1208.

Welds.

Filler Metal. Report of Joint Committee. Published in ASTM BULLETIN, No. 141, August, 1946, p. 56.

Wire.

Discussion published in ASTM BULLETIN, No. 142, October, 1946, p. 51.

Waldron, Leo.

Discussion, 640, 641.

Walker, Stanton

Discussion, Symposium on Freezing-and-Thawing Tests of Concrete, 1239, 1251.

Ward, Owen W.

Laboratory Testing of Plastics—Small-Scale Flexure Test. Published in ASTM BULLETIN, No. 138, January, 1946, p. 33.

Laboratory Testing of Plastics—Small-Scale Impact Test. Published in ASTM BULLETIN, No. 140, May, 1946, p. 50.

Warner, A. J.

Discussion, 1517.

Warner, J. C.

Definition of pH and Extension of the Acidity Scale to Nonaqueous Systems—Summary of Proceedings of the Symposium on pH Measurement, 1577.

Weaver, S. H.

The Effect of Carbide Spheroidization upon the Rupture Strength and Elongation of Carbon-Molybdenum Steel, 856. Discussion, 867.

Welch, W. E.

Effect of Temperature and Humidity on Mechanical Properties of Molded Cellulose Acetate Plastics, 1452.

Wesley, W. A.

Weathering Behavior of Corrosion-Resistant Steel Insect Screens, 652.

The Behavior of Nickel and Monel in Outdoor Atmospheres—Symposium on Atmospheric Exposure Tests of Non-Ferrous Metals—Summary of Proceedings of the Pittsburgh Spring Meeting, 1580.

Weyl, W. A.

The Theoretical Basis of Adhesion, 1506. Discussion, 1517, 1518, 1519.

White, A. E.

High-Temperature Alloys Developed for Aircraft Turbosuperchargers and Gas Turbines—Summary of Proceedings of the Symposium on Materials for Gas Turbines, 854.

Wilk, Benjamin

Discussion, 1293.

Discussion, published in ASTM BULLETIN, No. 143, December, 1946, p. 15.

Williams, Dave M.

Correlating Laboratory Accelerated Tests and Outdoor Tests by Means of Instrument Testing for Change in the Physical Properties of Paints. Published in ASTM BULLETIN, No. 144, January, 1947, p. 49.

Williams, H. G.

Discussion, 776.

Williams, I. V.

Results of 15 Years' Exposure Tests on Corrosion-Resistant Steels, 673.

Discussion, 615, 616.

Williams, W. Lee

Investigation of Materials for Marine Propellers, 836.

Wirshing, Ralph J.

Discussion, published in ASTM BULLETIN, No. 142, October, 1946, p. 20.

Withey, M. O.

Considerations Involved in the Making of Freezing-and-Thawing Tests on Concrete, 1198. Discussion, 1245, 1246, 1249, 1250.

Wolfe, R. A.

A Study of the Controlled Spectrographic Spark Sources—Summary of Proceedings of the Symposium on Spectroscopic Light Sources, 1579.

Woodard, D. H.

Influence of Strain Rate and Temperature on the Mechanical Properties of Monel Metal and Copper, 902.

Woods, K. B.

Discussion, 1246.

Work, Lincoln T.

Discussion, 1373.

Wray, R. I.

Discussion, published in ASTM BULLETIN, No. 142, October, 1946, p. 25.

Wuerpel, Charles E.

Discussion, Symposium on Freezing-and-Thawing Tests of Concrete, 1210.

Wyman, L. L.

Introduction—Summary of Proceedings of the Symposium on Testing of Parts and Assemblies, 852.

Discussion, 1095.

Z

Zmuda, Andrew

Stress Concentration and the Fatigue Strength of Engine Components—Summary of Proceedings of the Symposium on Testing of Parts and Assemblies, 852.
